## Compact Fluorescent

The wide range of Luxram compact fluorescent lamps in Geniss, Super mini, Extra mini and Standard categories are designed to replace traditional incandescent and halogen lamps. Besides the particular attention to the environment friendly production process, the state-of-the-art technology enables Luxram lamps to have stable performance in multiple applications.

# Compact Fluorescent

**500,000 times  
switching Cycles\***

The Supreme quality of Luxram compact fluorescent lamp assures 500,000 times switching Cycles.

\* Available for Luxram Pro product line.

# NEW

Compact  
Fluorescent

## Spiral

Luxram new high wattage spiral lamp is 50% shorter than traditional high wattage lamps. Beside of its reliable performance, it is the economic alternative because of the sharply increased rare earth metal cost.

## Ball

The globe shape lamp delivers the excellent lighting performance; it is the ideal replacement of incandescent globe lamp with 80% energy saving and 10,000 hours lifetime.

## Liquid Mercury Free

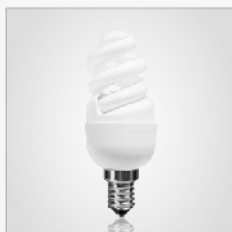

With the commitment to the environment, Luxram compact fluorescent lamp contains 0% liquid mercury.

## Energy Class A Rated

The complete range of Luxram compact fluorescent lamp complies with new European Union Directives.

## Packaging Presentation: Compact Fluorescent

A true green product = green product + green packaging

The new Luxram packaging has many advantages in one. The 100% recyclable paper packaging contains no plastic at all; the newly designed information bar gives maximum convenience to consumer to identify the correct product in the shop; the packaging can be hung or placed on the shelf in two ways.
